Death Skid Marks is a fun game but it is way to RNG based.

you pick a car and as you play you can add up to 3 other passengers. you can arm them with melee or ranged weapons or even give them the ability to repair, heal, or arm them with 1 use weapons (mines, bricks, missiles, ect). they each have different states that you can boost as you play. the point is to find a concert ticket for all your people as you try to take out most anything else on the road.

6.5/10 fun game but needing the stars to align just right to win is a bad flaw.

. **New content before release.**:

Well well... it seems that semi-trucks will be populating route 666 at launch after all.

As all the cars they come in different flavors. You will also be able to blow up their trailers separately. As far as difficulty goes, they offer a nice change of pace but they're far from being bad news. They fit right in with what we already have.

There is a good chance that this won't be the last good news before the 21st.. **Last good news before launch!**:
We have added a mad science lab.

The lab is a place where you can drop one of you buddies. You then decide for how many levels (road segments) he is experimented upon, the longer you leave him there, the higher are your chances that he'll get nice results.

After this duration you can pick him up and then you have a description of the experiments performed and the results.

So along with the workshop, this is a good way to give you an edge if fortune does not favor you with good weapons, tasks or items.

Those last additions were actually ideas that we had a while back and that we did not think would make it in the game prior to launch due to time. The good news is that they're in now. The bad news is that our list of ideas is complete for now and that nothing else will be added before launch.. **Version 1.03 (Update)**:
Hi,

We received your feedback and suggestions.

Here is the changelist from versions 1.01-1.03:

[Contents]

- New Road Background.
- Add flac format for the soundtrack.
- Update the mp3 files at 320 kbps.
- Stereo options.

[Bugs fixed]

- Bumper Sticker: Lost money when you go back to the main menu.
- Shield Car: Drain money after the level is over (panels) and you pressed mouse button.
- Hiker duplicates (except for the horsemask "fallback").
- Ambulance/Truck lose their invincibility (rear part) after healing.
- Game won't start: Email us or use the "Bug reporting forum" if you still get this one.

Some people didn't get the sound (only the music/voice). So we did some modification on the sound engine and this version

should fix the problem.

If you still get the same problem, try to disable the stereo options in the Option Menu.

Thanks,

JS.
